

# Everest and Lhotse Combination

Everest, Lhotse and Nupste, from the air.

Over the last several years we have had a number of climbers, when using our max oxygen flow system, possess the desire and strength to continue directly to Lhotse for a summit climb after summiting Everest. This approach to climbing Everest and Lhotse in the same season allows you to climb two 8000 meter peaks (the highest and 4th highest mountains in the world) in as little as 24 hours summit to summit. While no easy feat, our acclimatization program combined with our rest day at South Col, max oxygen usage and expert team of guides and sherpa make this a real possibility for our climbing members. In 2011 we set a historical precedent with our Everest-Lhotse climb - The first 3 climbers to summit two 8,000m peaks in less than 24 hours, the first guided climber to do so, and the first guide to accomplish the feat. Join us as we attempt to make history again.

## Logistics

You climb Everest first, using our maximum oxygen supply (4 liter flow per min). In good conditions we are back at the South Col between noon and 2pm. From here we have a variety of choices depending on weather and strength of climbers. We can either rest for a few hours at the South Col then do the 2 hour traverse to our Lhotse high camp or spend another night at the South Col and then move to Lhotse high camp the next day and summit the following day.

This is an amazing opportunity for the motivated climber to summit both these peaks with the best support available. No other company offers the expertise, logistical support and years of experience that Alpine Ascents provides. Our Veteran Himalayan guides are with you at all times along with the strength and support of the best Sherpa team on the mountain. (See [Guides and Sherpa](#).) Our rest day on the South Col (on oxygen) allows you to recuperate before summit attempt and the max 4 liter per minute oxygen flow gives you a much better chance of climbing fast and strong on the mountain.

Price: \$85,000 complete package RT KTM

Dates: March 30 - June 1, 2012

Arrive Kathmandu April 1, end date subject to change.
