

8-Day Training Course

Equipment List

Climbing Equipment

❑ **Ice Axe w/Leash.** General mountaineering tool. Sizing is important: under 5'7" use a 60cm tool; 5'7"- 6'1" use a 65cm tool; over 6'1" use a 70cm tool. (Too short is preferable to too long). No rubberized grips—they are heavy and do not plunge well into the snow. Make sure that you have a leash that is designed for use on a glacier axe. Please no technical leashes designed for ice climbing—they are too short, heavy, and not versatile.

❑ **Crampons.** With flat rather than “cookie cutter” frame rails. Anti-balling plates are useful in a variety of snow conditions. A combination heel bail/toe strap is a better system than a heel and toe bail system.

❑ **40 ft 6mm Accessory Cord.** For Prussiks. Please bring *as a continuous piece*, prussiks are cut as part of the curriculum. Choose cord that is soft and supple.

❑ **Alpine Climbing Harness plus two locking carabiners.** Harness should fit over all clothing, have gear loops, adjustable leg loops and be reasonably comfortable to hang suspended in. Make sure you can get into the harness without having to step through any part of it.

❑ **Carabiners.** 4 standard carabiners, regular size, D or Oval shaped carabiners.

❑ **Belay Device.** 1 device that is tube style which allows for a wide variety of uses as opposed to a figure-8 style.

❑ **Climbing helmet.** Must be adjustable to fit, with or without hat or balaclava on.

❑ **Trekking poles w/ snow baskets.** Snow/powder baskets are **required**. They are larger in diameter than the stock trekking baskets.

Helpful for balance when carrying a heavy pack, traveling on uneven terrain or if you have knee problems. **Collapsible three section pole preferred.**

Footwear

❑ **Double plastic climbing boots.** Good quality plastic shells with inner boots. Avoid tight fit with heavy socks. Comfort is key in buying plastic boots. Spend a little extra time walking around in the store or take them home and wear them around your house to make sure the fit is right. A little big is always better than a little small.

❑ **Gaiters.** Please make sure your gaiters fit around the plastic boots without being too tight around the boot. No lightweight hiking gaiters.

❑ **Wool or Synthetic Socks.** 3 pair heavyweight wool or synthetic socks (wool is warmer) to be worn over the liner socks. When layering socks, check fit over feet and inside boots. It is very important to buy new socks regularly as they lose their cushioning over time.

❑ **Liner Socks.** 3 pair of smooth thin wool, nylon or Capilene to be worn next to the skin. This reduces the incidence of blisters and hot-spots and helps the outer sock last longer before needing to be changed. They should fit well with your heavyweight socks.

Technical Clothing

❑ **Lightweight Long Underwear.** 1 top & 2 pair bottoms, synthetic or Merino wool. **No Cotton.**

❑ **Mediumweight Long Underwear Shirt.** Zip-T- neck top allows more ventilation options.

❑ **Heavyweight Soft Shell Jacket.** This jacket will be worn over your other layers and underneath your shell jacket.

❑ **Soft Shell Pants.** These non-insulated pants can be worn everyday during the climb as they are more versatile than fleece.

❑ **Hard Shell jacket w/ hood.** We recommend a waterproof breathable shell material with full front zipper, underarm zips, and no insulation. This outer layer protects against wind and rain.

❑ **Hard Shell Pants.** Waterproof, breathable. Full length side zippers preferred because it allows easy removal of pants, 7/8th zippers allowed but is more difficult to remove pants, no short lower leg zippers allowed.

❑ **Insulated Synthetic Pants.** This is a heavy insulating layer generally worn over your other pant layers. Lightweight synthetic is less bulky and generally warmer than fleece.

❑ **Insulated Down Jacket or Parka w/ hood.** Medium weight down or synthetic. Needs to fit over all layers. The jacket/parka is worn during breaks or climbing in extremely cold weather.

Headwear

❑ **Lightweight synthetic/wool hat.** Both the hat and the balaclava should be able to fit under the helmet. Hat should cover ears.

❑ **Balaclava.** Look for a simple lightweight model. (optional for late season climbing)

❑ **Baseball cap or other sun hat.** One with a good visor to shade the nose and eyes. Synthetic is nice as it dries quickly.

❑ **Glacier glasses (w/ side covers or wrap around).** Regular sunglasses are usually not sufficient. 100% UV, IR, high quality optical lenses designed for mountain use, must have side covers, and leashes. No more than 8% light transmission. If you wear contact lenses we recommend packing a spare pair of glasses—it is a good idea to have these with “photo-gray” or equivalent light-sensitive material so they can double as emergency sunglasses. If you wear glasses we recommend prescription glacier glasses (gray or amber).

❑ **Bandana.** Used to shade your neck.

❑ **Goggles.** 1 Pair ski goggles. Goggles are used instead of glacier glasses when weather turns severe.

Handwear

❑ **Lightweight Synthetic Liner Gloves.** 1 Pair. Worn alone on very sunny days for hand protection or as a layering piece with your Shell mitts.

❑ **Soft Shell Gloves.** 1 Pair. This glove is usually worn alone and during times when the shell mitts would be too warm. This glove can have a light shell exterior.

❑ **Shell Mitts w/ insulated removeable liners.** Waterproof, breathable shell material. We recommend that the insulation in your mitts can be removed in order to dry faster. Make sure that you can wear your Lightweight Synthetic Liner gloves inside the mitts. Shell gloves “ski gloves” can substitute for mitts during the later part of the climbing season. during the later part of the climbing season.

Over Please

Personal Equipment

- ❑ **Expedition Backpack.** Internal frame pack expandable to a minimum of 5,500-6,000 cu.in. Keep it simple and light, avoid unnecessary zippers, etc which add weight.
- ❑ **Sleeping Bag.** High quality with hood to at least 0° bag. If you sleep cold bring a warmer bag. It should be roomy enough for comfortable sleeping but snug enough for efficient heat retention.
- ❑ **Compression stuff sack.** Necessary to reduce volume when packing a sleeping bag.
- ❑ **Avalanche Transceiver.** Digital is preferred over analog due to ease of use and unit should operate at 457mhz.
- ❑ **Self Inflating pad.** One 3/4 or full length pad. If you are over 6' a Long is recommended. Include a valve stem and patch repair kit.
- ❑ **Closed-Cell foam pad.** One full length closed cell is recommended.
- ❑ **Tent.** 2 person, **4-season** mountain tent. Make sure there are guy lines for body and fly. **No 3-season** tents. Include snow stakes.
- ❑ **Cooking gear:**
 - Cup:** 12-16oz. plastic **insulated mug** with snap-on lid (retains heat well and is spill-resistant in the tent).
 - Spoon:** Good quality tough plastic (lexan). You do not need a plastic knife and fork.
 - Bowl:** Deep plastic with 2-3 cup capacity.
 - Cooking pot:** 2qt. minimum, lightweight pot with tight fitting lid and handle. 2-3 qt. capacity works the best for cooking and melting snow. Aluminum or titanium are much lighter and easier to use than stainless steel. Make sure you **include pot grabbers** to hold your pot.
- ❑ **Backpacking stove.** Complete liquid fuel stove and repair kit. Make sure fuel pump is included. Gas canister stoves are not recommended as you have to supply your own fuel and they are much heavier and take longer to boil water.
- ❑ **Fuel bottle (33oz).** Alpine Ascents will supply the fuel. We can supply the bottles at no cost due to expanded airline security measures.
- ❑ **Headlamp.** Bring spare bulb & batteries. **No Halogen bulbs** as they are more expensive, take more power & have a shorter life.
- ❑ **Small personal first-aid kit.** (Simple and Light) Aspirin (Extra Strength Excedrin is best), Antibiotic ointment, Moleskin, molefoam, waterproof first-aid tape, athletic tape, Band-Aids, personal prescriptions, etc. The guides will have extensive first-aid kits, so leave anything extra behind. Please let your guide know about any medical issues before the climb.
- ❑ **Sunscreen.** SPF 30 or better, 2 small tubes. Make sure that the sun screen is not older than 6 months. Sunscreen older than six months loses half of its SPF rating.
- ❑ **Lipscreen.** SPF 30, at least 2 sticks. Not older than 6 months.
- ❑ **Water Bottles:** 2 to 3 Wide mouth bottles with minimum 1 Litre capacity per bottle. **No water bag or bladder systems**, they freeze or are hard to fill.
- ❑ **Pee Bottle (1 Liter).** Large mouth, clearly marked water bottle. Collapsible 1 liter canteen takes up less volume than a bottle when empty.
- ❑ **Water Purification tablets.** 1 bottle. Water filters are too heavy and clog quickly with silt. Suggested Iodine or AquaMira (Non-iodine)
- ❑ **Toiletry bag.** Include toilet paper (no more than one roll stored in plastic bag), Purell or other alcohol hand sanitizer, toothbrush, small toothpaste. **Do not include** soap, shampoo, deodorant, or cosmetics.
- ❑ **Insect repellent.** Small bottle. Not necessary until July. Do not use repellent that is stronger than 25% DEET.
- ❑ **Compass.** With sighting mirror and declination adjuster.
- ❑ **Knife or Multi-Tool.** Medium sized. Keep the knife simple.
- ❑ **Lighters (2).** We recommend disposable, adjustable lighters, rather than matches, for lighting stoves. Make sure the lighter is new and full of fuel.
- ❑ **Trash Compactor bags (3).** To line stuff sacks to keep gear dry. Trash Compactor bags are made from a heavier plastic.
- ❑ **Camera.** Optional. We recommend a small digital or point and shoot cameras. Please do not bring large SLR cameras with extra lenses.
- ❑ **Food for course.** See enclosed menu planning guide. Your lunch bag should weigh as much as your dinner & breakfast bags combined.

Traveling

- ❑ **Large duffle bag w/ travel lock.** Used for transporting your gear and for storage of extra gear at Alpine Ascents.
- ❑ **Travel clothes.** A set of clean clothes is nice to change into after the trip.

Food

-Please review the "Menu Plan" document that was included in your confirmation materials for what items you are expected to bring.
